PROFESSIONAL SUMMARY

UI/UX Designer and product strategist with 4+ years of experience delivering research-driven digital products for fintech, e-commerce, tourism and B2B clients. I translate complex business requirements into intuitive, accessible interfaces leading user research, competitive analysis, wireframing and high-fidelity prototyping in Figma. I scope, estimate and prioritize work in fast-paced environments, collaborate across business, technology and creative teams, and ship polished designs through to production.

EXPERIENCE & PROJECT HIGHLIGHTS

Lead end-to-end UI/UX design for e-commerce, tourism and banking platforms, including a youth-focused mobile banking app and a research-driven tourism explorer (KenyaTrace). Conducted user research, stakeholder interviews, competitive analysis and usability testing to ground every design decision in evidence and insight. Built scalable design systems typography scales, colour theory, reusable component libraries and documented them for consistent product teams. Created wireframes, user flows, journey maps and high-fidelity prototypes in Figma with developer-ready specs and clean handoff. Collaborated with business, technology and creative stakeholders to scope, estimate and prioritize features, delivering on tight deadlines. Designed and shipped 7+ live, responsive websites and web apps (React, Next.js, TypeScript), bridging design and front-end implementation. Applied on-page SEO, GA4 analytics and WCAG accessibility fundamentals to improve usability, visibility and conversion.
